

REVIEW

Book: Basic Accounting: Study Guide

"...*Basic Accounting: Study Guide* contains different examples, approaches and types of exercises in order to get the students interested and to assure easier understanding the basic concepts of accounting...

...The Study Guide contents following chapters:

Chapter 1: "Examples for exercises"

Chapter 2: "Examples for practical exercises"

Chapter 3: "Self test exercises"

Chapter 4: "Exercises with solutions"

Each chapter of the Study Guide corresponds to a chapter in the textbook "Basic of Accounting" by Slobodan Malinc and Ana Lalevic-Filipovic. This textbook and the Study Guide are for second year students of Faculty of Economics in Podgorica for the school year 2008/2009.....

... This Study Guide comprises all significant areas of the basic accounting recording and financial reporting. The Study Guide can be useful learning tool to check the students` ability to apply the concepts to different problem situations.

....Having in mind all above mentioned I recommended to publish "Basic Accounting: Study Guide."
